

ISO 9001:2015 transition – don't leave it too late!!

As the deadline of September 2018 for ISO 9001:2015 Certification / Transition gets closer, now is the time to book a Consultant, before it's too late!!

If you require a Consultant to assist your company with transition or get your first time implementation started, contact maxi-mize QA.

Knowing the ropes and knowing what is required during a 3rd party registration audit is a great advantage.

maxi-mize QA can project lead your QMS implementation by following a clear step by step implementation strategy suitable for your company, which ensures that the project runs smoothly.

If you have a team currently working with ISO 9001, they can work with maxi-mize QA to produce a first set of new established Quality Management System documentation. Afterwards will come training and evidence record keeping prior to the 3rd party audit, which is based on showing evidence that you are actually following the new system, according to the new ISO standards.

Any issues that may arise are addressed and the QMS implementation is kept on schedule. The result is a more effective and efficient QMS implementation experience to ensure the smooth launch on your QMS and keeps it on track throughout the entire implementation or transition process and smoother running operations in the long term.

maxi-mize QA can also provide services for facilitation of Management Review Meetings and Internal Audits on an on-going, ad-hoc basis to keep the QMS up to date at all times.

**maxi-mize QA has successfully implemented and transitioned
ISO 9001 for companies across the UK**
